[NON-GRANTED
PURELY TEMPORARY]

This has reference to your application for the post of **Sewage Treatment Plant Operator** in Institute/College/School/Unit run by our management and subsequent interview you had with us, we are pleased to offer you **adhoc basis / temporary appointment** on the post of **Sewage Treatment Plant Operator** on the following terms and conditions :-

-: Terms and Conditions :-

1. The aforesaid job has arisen for as short period. Accordingly, your post and appointment is purely temporary in nature and for fixed period. Your appointment shall commencing from **01/10/2023 and cease on 31/08/2024**; unless extended by us in writing, but it may be terminated at any time earlier without any notice and without assigning any reason; without payment in lieu of notice. Further, in case your services are not extended, your services will automatically come to an end on the said date, No notice will be required for termination of your services either at the end of your original period of appointment or extended period of appointment.
2. You shall be paid a consolidated salary of **Rs. 12,000/-** (Rs. Twelve Thousand Only) per month. No other allowances or other benefits as admissible to other regular employees will be admissible to you.
3. Your service will be liable to be transferred from one place to another and/or from one section to another section/branch or one Institute/College/School to another Institute/College/School run by the management in existence or which may come in to existence.
4. Your service conditions in other respects will be governed by the Rules/Regulations of the Institute/College/School, as in force from time to time, where you will be posted. You will abide by the said Rules.
5. Your continuation in the service will be subject to your remaining physically and mentally fit and alert. The Management shall have every right to get you medically examined or re-examined at any time by the Registered Medical Practitioner, Eye Specialist or Civil Surgeon, Whose findings will be final and binding up on you.

2..

..2..

6. You will not, without prior written permission of the management, carry on business or enter for any part of your times, in any capacity the services of or be employed by any other Firm, Institute, Company or Person.
7. You shall submit the original as well as certified true copies of the documents, relevant testimonials, previous experience certificates, Aadhar Card, PAN Card, Birth Date Certificate etc. before joining your duties.

In case the above terms and conditions are acceptable to you, please signify your acceptance by signing a copy of this offer letter.

On your acceptance of the above said terms and conditions, your place of posting shall be at **K.B.H. Dental College & Hospital, Panchavati, Nashik - 3**, you shall join your place of posting, as communicated to you after your acceptance, within seven (07) days, failing which this appointment shall stand automatically cancelled. Your appointment shall commencing from **25/11/2021 and cease on 24/10/2022**; unless extended by us in writing, but it may be terminated at any time earlier without any notice and without assigning any reason; without payment in lieu of notice. Further, in case your services are not extended, your services will automatically come to an end on the said date, No notice will be required for termination of your services either at the end of your original period of appointment or extended period of appointment.
2. You shall be paid a consolidated salary of **Rs. 11,000/-** (Rs. Eleven Thousand Only) per month. No other allowances or other benefits as admissible to other regular employees will be admissible to you.
3. Your service will be liable to be transferred from one place to another and/or from one section to another section/branch or one Institute/College/School to another Institute/College/School run by the management in existence or which may come in to existence.
4. Your service conditions in other respects will be governed by the Rules/Regulations of the Institute/College/School, as in force from time to time, where you will be posted. You will abide by the said Rules.
5. Your continuation in the service will be subject to your remaining physically and mentally fit and alert. The Management shall have every right to get you medically examined or re-examined at any time by the Registered Medical Practitioner, Eye Specialist or Civil Surgeon, Whose findings will be final and binding up on you.

2..

..2..

6. You will not, without prior written permission of the management, carry on business or enter for any part of your times, in any capacity the services of or be employed by any other Firm, Institute, Company or Person.
7. You shall submit the original as well as certified true copies of the documents, relevant testimonials, previous experience certificates, Aadhar Card, PAN Card, Birth Date Certificate etc. before joining your duties.

In case the above terms and conditions are acceptable to you, please signify your acceptance by signing a copy of this offer letter.

On your acceptance of the above said terms and conditions, your place of posting shall be at **K.B.H. Dental College & Hospital, Panchavati, Nashik - 3**, you shall join your place of posting, as communicated to you after your acceptance, within seven (07) days, failing which this appointment shall stand automatically cancelled. Please note.

[Dr. PRASHANT V. HIRAY]
GENERAL SECRETARY
MAHATMA GANDHI VIDYAMANDIR
PANCHAVATI, NASHIK-3

I have read and understood the terms and conditions mentioned in this letter of appointment. I accept the same. I shall join my duties on or before 25/11/2021.

Date : 25/11/2021

[NON-GRANTED
PURELY TEMPORARY]

This has reference to your application dated 27/12/2019 for the post of Sewage Treatment Plant Operator in Institute/College/School/Unit run by our management and subsequent interview you had with us, we are pleased to offer you **adhoc basis / temporary appointment** on the post of Sewage Treatment Plant Operator on the following terms and conditions.

-: Terms and Conditions :-

1. The aforesaid job has arisen for as short period. Accordingly, your post and appointment is purely temporary in nature and for fixed period. Your appointment shall commencing from **20/01/2020 and cease on 19/12/2020**; unless extended by us in writing, but it may be terminated at any time earlier without any notice and without assigning any reason; without payment in lieu of notice. Further, in case your services are not extended, your services will automatically come to an end on the said date, No notice will be required for termination of your services either at the end of your original period of appointment or extended period of appointment.
2. You shall be paid a consolidated salary of **Rs. 11,000/-** (Rs. Eleven Thousand Only) per month. No other allowances or other benefits as admissible to other regular employees will be admissible to you.
3. Your service will be liable to be transferred from one place to another and/or from one section to another section/branch or one Institute/College/School to another Institute/College/School run by the management in existence or which may come in to existence.
4. Your service conditions in other respects will be governed by the Rules/Regulations of the Institute/College/School, as in force from time to time, where you will be posted. You will abide by the said Rules.
5. Your continuation in the service will be subject to your remaining physically and mentally fit and alert. The Management shall have every right to get you medically examined or re-examined at any time by the Registered Medical Practitioner, Eye Specialist or Civil Surgeon, Whose findings will be final and binding up on you.

ACKNOWLEDGEMENT.

MM Consultancy Services Nashik is grateful to the Trustee Shri Pratik Kale Sir & Management of Mahatma Gandhi Vidya Mandir's K.B.H. Dental College & Hospital Panchavati Nashik for giving us an opportunity to carry out a detailed GREEN audit of their complex to identify potential for Green Initiatives taken in their complex to optimize environmental upgradation.

Environmental improvements by following green initiatives have gained utmost importance today for education institutions as environmental conditions are deteriorating day by day & therefore efficient GREEN management is the need of the hour. Apart from energy savings, Green Initiative effort leads to reduction in Greenhouse gas emissions which improves our environment to protect our planet earth from drastic climate changes & overall natural disturbance. We really appreciate the mission & vision of Shri Apurva Hiray & his team to acknowledge the importance of energy & environment upgrades for sustainable development for present & future generation.

National Assessment & Accreditation Council (NAAC) has also emphasized energy conservation & environment protection for educational institutions by providing an adequate platform for accreditation & Rating to encourage them for special efforts for these noble causes. Needless to say, our present & future generation can survive only if sufficient weightage & importance is given from our end to upgrade our present systems more in line with Nature & natural processes.

We are also grateful to Shri Kiran Deore, Maintenance In-Charge for necessary tech. inputs & proper co-operation provided for audit. Without his Initiative & urgency, this audit could not be successful & transparent for a healthy reference. It may be noted that our audit is not faultfinding exercise but is intended to bring about continual improvements in your college campus for the benefits of all of us incl. our future generation.

Our Sincere thanks to KBH College Team who provided us with adequate data & tech. information to make this audit successful.

EXECUTIVE SUMMARY.

The future of humankind depends very much on our ability to change our lifestyles and agree to follow a low consumption pattern of living in terms of resources taken from the globe and return to a sustainable development path at the earliest. The opportunity window for restoring nature to its prolonged state of hosting life forms to flourish under its caring environs is according to scientists, very short and lasting only up to 2030. Within this time, with the willing actions of every citizen wherever they are, coordinated and directed actions should start and continue thereafter till a balancing stage is reached where moderate use of resources and mitigation actions for healing the hurts already inflicted, balance positively to a sustainable nature.

Eco campus is a concept implemented in many educational institutions, all over the world to make them sustainable because of their mass resource utilization and waste discharge in to the environment. MSG College believes that there is an urgent need to address these fundamental environmental problems and reverse the trends. The purpose of the audit was to ensure that the practices followed in the campus are in accordance with the Green Policy adopted by the institution.

Green Auditing of a Higher Education Institution is required as a part of Criterion VII (of the 7 criteria prescribed) under the Guidelines for Submission of the mandatory annual Internal Quality Assurance Report (IQAR) by Accredited Institutions. It works on the several facets of Green Campus including Water Conservation, Tree Plantation, Waste Management, Paperless Work, and Alternative Energy. With this in mind, the specific objectives of the audit was to evaluate the adequacy of the management control framework of environment sustainability as well as the degree to which the Departments are in compliance with the applicable regulations, policies and standards.

Initially a questionnaire survey was conducted to know about the existing resources of the campus and resource consumption pattern of the students and staff in the college. In order to assess the quality of water and soil, water and soil samples were collected from different locations of the college campus and analysed for its parameters. Collected data was grouped, tabulated and analysed. Finally a report pertaining environmental management plan with strength, weakness and suggestion on the environmental issue of campus documented.

INTRODUCTION.

Environmental audit or Green audit reflects evaluations that help us to identify environmental compliance and management system, implementation gaps, along with related corrective actions. Green audit is a useful tool to determine how and where the most energy or water resources are being used, the type and volume of waste generated and can then considerations be given on how to implement changes and make savings. It can create health consciousness and promote environmental awareness, values and ethics. Overall, it plays a vital role in imparting a better understanding of Green impact on campus to staff and students.

Need for green audit

As environmental sustainability is becoming an increasingly important issue for the nation, the role of higher educational institutions in relation to environmental sustainability is more prevalent. In this context, it becomes imperative to adopt the system of the Green Campus for the Institutes which will lead to sustainable development. Besides, it also reduces a sizable amount of atmospheric carbon dioxide from the environment.

Green Audit is assigned to the Criteria 7 of NAAC, National Assessment and Accreditation Council which is a self-governing organization of India that accredits the institution according to the scores assigned at the time of accreditation. NAAC has made it mandatory that all Higher Educational Institutions should submit an annual Green Audit Report. Moreover, it is part of Social Responsibility of the Higher Educational Institutions to ensure that they contribute towards the reduction of global warming through Carbon Footprint reduction measures.

Objectives of the audit.

- * Understanding the current practices of sustainability with regard to the use of water and energy, generation of wastes, transportation, purchase of goods, etc;
- * Establishing a baseline of existing environmental conditions with focus on natural and physical environment;
- * Creating awareness among students and staff concerning real issues of environment and its sustainability;
- * To create a report that document baseline data of good practices and provide strategies and action plans towards improving environmental quality for the future.

PROFILE OF KBH COLLEGE.

Karmaveer Bhausahab Hiray Dental College and Hospital is a premier dental college in Maharashtra under the aegis of Mahatma Gandhi Vidyamandir trust. Established in 1991, it has the distinction of being the first self-financed unaided Dental college of Maharashtra, with great vision to provide quality dental education to students with state-of-the-art infrastructure. This institution has reached magnificent heights under the leadership of Hon. General Secretary Dr. Prashant V. Hiray and Hon. Coordinator, Dr. Aapoorva Prashant Hiray.

Our Institution is the proud recipient of the "Most Reputed Private Dental College in Maharashtra" award by TIME CYBER MEDIA. KBH Dental College and Hospital offers Bachelor of Dental Surgery course with an intake of 100 students. The college offers 29 seats in 7 specialties to pursue postgraduate Master of Dental Surgery course. It also serves as a research centre for PhD courses.

Karmaveer Bhausahab Hiray Dental College and Hospital has the rare distinction of being one of the few dental institutes in Maharashtra to have a wide repertoire of modern equipment like Cone Beam Computed Tomography, operating microscope, soft tissue lasers and penta head multi viewing microscope. Our institution boasts of a library with an exhaustive compilation of books and international, national journals and a digital library.

KBH Dental College has played a cascading role in the successful career of innumerable students. The institution believes in holistic development of students. Our institution has numerous achievements with our eminent faculty members, undergraduate and postgraduate students excelling at the national stage in scientific deliberations. Our experienced teaching faculty has numerous National and International publications to their credit. Numerous research projects are underway in various departments. Our alumnus comprises of reputed practitioners and excellent academicians who have made us proud with their success in India and other countries across the globe.

In the last 29 years, the institution is providing access to dental treatment to the lower strata of the society by ensuring free dental treatment to patients below the poverty line. Over a lakh needy patients are treated each year. Nearly 300 dental check-up and treatment camps are conducted at schools and in remote areas where dental treatment facilities are unavailable. An air-conditioned mobile dental van caters to the rural population. Our institution has set up

two satellite centres, to improve the reach of dental treatment to the residents of Nashik District.

Raj Rajeshwari Dental College and Hospital, located in Umarda, Udaipur is the latest addition to Mahatma Gandhi Vidyamandir Trust. Set in a serene five acre campus, at the periphery of Udaipur, this educational institute provides undergraduate BDS course. Nearly 150 patients are provided free dental treatment on a daily basis. There are excellent facilities for teaching and learning with spacious lecture halls integrated Smart Class facilities and preclinical laboratories. An auditorium with 500 capacity provides ample opportunities for the conduct of continuing dental education programmes. Dental camps are frequently organized in schools, colleges and rural areas in Nashik district with the motto of creating dental awareness and providing treatment at their door step. Nearly 30 villages are visited by our committed staff and students with the intent of screening and treating dental diseases. A well-equipped air-conditioned mobile dental van allows for examining and treating patients during these dental camps.

College Profile

Spread over five acres of land with a built up area of 1,67,500 square feet over six floors, this college provides quality dental education to students. Set over two separate wings housing the clinical and para-clinical departments, the institute provides treatment to over 600 patients a day

Our campus is a collation of well-equipped dental clinics, smart lecture halls, auditorium and laboratories. Our library with a comprehensive collection of books and national and international journals is an asset to the students.

Internet enabled computers allow the access of the digital library facility which provides extensive online and offline databases for students. It has separate reading rooms for Staff and Students.

The campus also houses well-furnished separate girls' and boys' hostels and cafeterias serving sumptuous food. The large expanse of the playground is a sight to behold and provides for recreation and sports

Armed with the most experienced and dedicated teaching faculty committed to guide the students in theory to develop strong practical skills necessary to treat patients, our institution has been a hallmark of excellence over the last two decades.

Our alumnus comprises of reputed practitioners and excellent academicians who have made us proud with their success.

Salient Features

- The rare distinction of being one of the few dental institutes in Maharashtra to have a wide repertoire of modern equipment like Cone Beam Computed Tomography, operating microscope, soft tissue lasers and penta head multi viewing microscope.
- KBHDC trains postgraduate students in dental implants and the latest dental treatment options.
- Our experienced teaching faculty has numerous national and international publications to their credit.
- Numerous research projects are underway in various departments.
- Our institution has set up two satellite centres to improve the reach of dental treatment to the residents of Nashik District.
- Air-conditioned Mobile dental van housing two electrically operated dental chairs for screening and dental treatment in rural areas.

Achievement

- Miss Shalmali Gagare contested at the International Chess Competition.

Dental Innovations

- Dr Sameer Jain developed a unique root canal obturating device and was listed among innovators under 35 in MIT Technology Review.
- Dr Amey Patil won the first prize at the international stage for inventing the Pico hydroelectric toothbrush.
- Dr Amol Jadhav is credited with the invention of Potentio Kinetiko Oscillating toothbrush.

METHODOLOGY.

In order to perform green audit, the methodology that included different tools such as preparation of questionnaire, physical inspection of the campus, observation and review of the documentation, interviewing key persons and data analysis, measurements and recommendations was adapted.

Onsite Visit.

Field visit was conducted by the Green Audit Team. The key focus of the visit was on assessing the status of the green cover of the Institution, their waste management practices and energy conservation strategies etc.

Focus Group Discussion.

The Focus Group discussions were held with staff members and the management focusing various aspects of Green Audit. The discussion was focused on identifying the attitudes and awareness towards environmental issues at the institutional and local level.

Energy and waste management.

With the help of Teaching, Non- teaching staff, students, Administrative officer, Building Management Engineer and electrical Supervisor, the audit team has assessed the energy consumption pattern and waste generation, disposal and treatment facilities of the college. The monitoring was conducted with a detailed questionnaire survey method.

The study covered the following areas to summarize the present status of environment management in the campus:

- * Water management
 - Energy Conservation
 - Waste management
 - E-waste management
 - Green area management
 - Environmental Monitoring.

OBSERVATIONS & RECOMMENDATIONS.

1. WATER MANAGEMENT.

The study observed that the main source of water for the institute is received from Municipal Corporation. Water for potable purpose is received from Municipal corporation in a 45 KL underground tank on ground floor. Water is used for drinking purpose, toilets and gardening. The waste water from the RO water purifier is used for gardening purpose. During the survey, no loss of water is observed, neither by any leakages, or by over flow of water from overhead tanks. The data collected from all the departments is examined and verified. On an average the total use of water in the college is 20000L/day, which include 5500 L/day for domestic, 6000 L/day for gardening & Lab purposes and 8500 L/day for drinking purpose.

Sewage Treatment Plant of 50000 Lit/Day capacity is already operating round the clock to recycle & reuse waste water & is maintained well by the campus. Recovered water is used for Gardening.

There is a good potential for rain water harvesting from the terrace of old as well as new building & campus management is very keen to commission this project soon.

Pipes carrying harvested rainy water from building terrace & Roofs have to be provided around the building connected to common pipe leading to well by underground route.

Harvested rain water can be used for recharge of well & also for Gardening. Recharging of well in the premises helps to improve the yield of existing borewells particularly in summer season & assists college management to save on additional bills on outside water tankers in dry season.

Recommendations—

- It is however recommended to further make use of terrace space of other buildings available to optimize rain water harvesting. As rain water is purest form of water, it could be conserved in large storage tanks for efficient use in summer season.
- Quality analysis of RO outlet water used for drinking purpose is available & within permissible limits as verified.
- There should be a suitable frequency to clean the underground water storage tanks preferably every six months.

- Harvested rainy water should be measured by installing a suitable water meter on main piping discharging to well. Monitoring of harvested rain water on daily/weekly basis can provide adequate data for future planning.

2. ENERGY MANAGEMENT.

This indicator addresses energy consumption, energy sources, energy monitoring, lighting, appliance, natural gas and vehicles. Energy use is clearly an important aspect of campus sustainability and thus requires no explanation for its inclusion in the assessment. The study carried out also analysed the use of alternate energy resources that are eco-friendly.

The energy is utilized in the Campus for lighting, space heating and cooling, running of laboratory instruments, appliances, water heating, ground water pumping, cooking and transportation. The source of energy for all the buildings within the campus is through electricity only.

The institution consumes about 25000 Units per Month as indicated in the following Table. There is no solar power plant installed in the campus to promote green power generation. The campus contains Lights and fans in use. Average cost of power purchased from MSEDCL is estimated @ Rs.16.81 per KWH.

The entire campus including common facility centres are to be equipped with LED lamps and LED tube lights, except at few locations. Computers are set to automatic power saving mode when not in use. Also, campus administration runs on switch-off drill on regular basis. Noteworthy observation in the campus during our audit is provision of 35 % LED Lights in the campus which needs to be raised to 90 %.

Electricity Bill Analysis

Months	Units	Amount	Unit Rate	AD-KVA	BD-KVA	Diff. KVA	Addl.DC Paid	PF	Demand Charges
May-23	24283	401608	16.54	116	126	10	4990	0.863	499

Jun-23	24899	413861	16.62	123	117	-6	-2724	0.927	454
TOTAL	259793	4366290	16.81				118760	Rs.	
Additional Demand Charges paid during the year due to higher contract demand								Rs.	118760

Energy Rating

After the complete survey and analysis of the campus as per ISO 50001:2018 Energy Management System Standards, we rate the campus Score 3/5.

RECOMMENDATIONS.

- 200 Kw solar power plant is recommended for the campus to generate green energy & reduce present electricity bill to bare minimum. Campus management have already planned this project.
- All present lighting to be replaced with LED to conserve energy & CO2 emission.
- Compressed air leaks should be fixed on priority.
- Present Transformer & LT Breaker location to be cleaned & fenced for restricted entry. Further present energy inefficient 315 KVA Transformer to be replaced with new Transformer to minimize Losses.

WASTE MANAGEMENT.

This indicator addresses waste production and disposal of different wastes like paper, food, plastic, biodegradable, construction, glass, dust etc. Furthermore, solid waste often includes wasted material resources that could otherwise be channelled into better service through recycling, repair, and reuse. Solid waste generation and management is a burning issue. Unscientific handling of solid waste can create threats

to everyone. The survey focused on volume, type and current management practice of solid waste generated in the campus.

Liquid Waste Management-

Water conservation is a key activity as water availability affects on the development of the campus as well as on all area of development such as farming, industries, etc. Keeping this view water conservation activity is carried out.

The waste water generated is recycled & reused for gardening through 50000 Lit per day Sewage Treatment Plant which operates on round the clock basis. The source of wastewater is Domestic Waste Water i.e., Sewage water, Lab water & chemical wastes. The Sewage water mainly comes from Toilets of college, hostel, kitchen and canteen.

RECOMMENDATIONS-

- A Suitable Sewage Treatment Plant (SWP) is already in use to treat sewage water for recycling & reuse purpose. Treated water is used for Gardening. As water scarcity is becoming serious issue day by day, recycle & reuse of waste water is highly appreciated.
- Sludge generated from SWP can be effectively used to produce manure which can be utilized for various plants in the Campus.

Solid Waste Management-

Waste generated from tree droppings and lawn management are major solid wastes generated in the campus. Separate dustbins are provided for Bio-degradable and Plastic waste in order to segregate them at the source itself.

Single sided used papers are reused for writing and printing in all the departments to minimize the usage of papers. Important and confidential reports/ papers are sent for pulping and recycling after completion of their preservation period. Very less plastic waste (0.1Kg/day) is generated by some departments, office, garden etc and campus is declared as Plastic Free zone. Metal waste and wooden waste is stored and sent to authorize scrap agents for further processing. Glass bottles are reused in the laboratories. Medical wastes are disposed off through a special carrier provided by municipal corporation on weekly basis.

The college has separate bins to collect biodegradable and non-biodegradable waste generated in the campus. Regular meetings are conducted with ground staff regarding the cleanliness of the campus and proper disposal of waste.

Vermicompost is **the product of earthworm digestion and aerobic decomposition using the activities of micro- and macro organisms at room temperature**. Vermicomposting, or worm composting, produces a rich organic soil amendment containing a diversity of plant nutrients and beneficial microorganisms.

Vermicomposting is a kind of composting, certain species of earthworms are employed to make compost. It is basically a mesophilic process that employs microbes and earthworms. **The earthworms feed on organic waste material and excreted them out in a granular form (cocoons).**

Campus have to initiate & execute Vermicomposting project in the cool zone to dispose off collected solid wastes on regular basis & thereby generating a compost which is used exclusively in Campus Garden.

RECOMMENDATIONS.

Vermicomposting Project is recommended to be installed to dispose off huge solid wastes being generated in the Campus. It is therefore recommended to install high capacity disposal systems in a cool location. Apart from efficient disposal of solid wastes, the process can generate a good quality manure which can be sold in market if exceeded the campus demands.

- Regular cleaning & collection of solid wastes is recommended to avoid huge spread all over spoiling the beauty of Campus. Housekeeping efforts need to be increased to maintain the site clean & waste free.

E-Waste Management-

E-waste is a consumer and business electronic equipment that is near or at the end of its useful life. This waste makes up about 5% of all municipal solid waste worldwide. It is hazardous than other waste because electronic components contain cadmium, lead, mercury, and Polychlorinated biphenyls (PCBs) that can damage human health and the environment.

E-waste generated in the campus is of minimal quantity. It is being effectively managed, keeping in mind the environmental hazards that may arise if not disposed properly.

The cartridges of laser printers are refilled outside the college campus. Awareness programme was conducted by college regarding E-waste Management. The E-wastes and defective items from computer laboratories are being stored properly and recycled in effective Manner.

The dismantled hardware of personal computers are used in PC trouble shooting lab. The dismantled electronic spare parts are immediately sold for reuse. The minimal amount of e- waste that is generated is taken by external vendor with Proper MOU.

The Campus at present works on 70 % paperless functioning. Only critical circulars & Displays are printed out where necessary. 30 % Paper wastes are disposed off through Municipal take away system.

RECOMMENDATIONS.

- A wastewater treatment plant is already installed to recycle and reuse the waste water generated from domestic use.
- Use reusable resources and containers and avoid unnecessary packaging wherever possible.
- The management should take an initiative to purchase recycled resources when they are available.

GREEN AREA MANAGEMENT.

This includes the plants, greenery and sustainability of the campus to ensure that the buildings conform to green standards. This also helps in ensuring that the Environmental Policy enacted, enforced and reviewed using various environmental awareness programmes.

Many trees are maintained in the campus (around 102 species) to maintain the bio diversity. Various tree plantation programmes are being organized at college campus through NSS (National Service Scheme) unit and Management. This program helps in encouraging eco- friendly environment which provides pure oxygen within the institute and creates awareness among campus students. The plantation program includes various types of indigenous species of ornamental and medicinal wild plant species.

Botanical Garden should be developed in the premises with a Barcode system provided for each of Trees planted. In spite of existing space restriction, the garden can be developed further as lush Green & needs further housekeeping. There is further scope for plantation in the backside ground area. More Tree plantation is highly recommended to enhance Green beauty of the Campus.

Roads-

Roads in college are laid with provision for rainwater to seep through easily. This enables the easy recharge of ground water. However, roads are not suitable for pedestrians which should be noted & corrective steps to be taken.

Plastic free campus

The usage of plastic in college is minimal. The staff and the students are not encouraged to use plastic, plastic bags and disposable plastic things throughout the campus.

E – communication.

The Main office, all the Departments of the college, Examination cell, and laboratories are very well connected with a good and efficient LAN network. Hence all the inter office correspondence is done through email. This reduces the usage of papers. Present paper usage is 60% which should be reduced to 30.% in future.

RECOMMENDATIONS.

- Review periodically the list of trees planted in the garden, allot numbers to the trees and keep records.
- ➤ Establish a College Environmental Committee that will hold responsibility for the enactment, enforcement and review of the Environmental Policy.
- ➤ Environmental Committee shall be the source of advice and guidance to staff and students on how to implement this Policy.
- ➤ Ensure that an audit is conducted annually and action is taken on the basis of audit report, recommendation and findings.
- ➤ Indoor plantation to inculcate interest in students, Bonsai can be planted in corridor to bond a relation with nature. Environmental monitor to be installed.
- Use of Bicycles & Battery- operated vehicles is recommended in the Campus to eliminate Green gas emissions to improve the environment.
- Housekeeping inside & outside needs improvement. Also Toilet/Urinals cleaning should on regular basis to avoid unhygienic situation
- Canteen RO Unit should be repaired on priority.

ENVIRONMENTAL MONITORING.

As part of green audit of campus, the Green Audit Assessment Team has carried out the environmental monitoring of campus. This includes Illumination, Noise level, ventilation and indoor air quality of the class rooms. It was observed that illumination and ventilation is adequate considering natural light and air velocity present. Noise level in the campus is well below the limit.

Campus has maintained pollution free environment with good use of available resources.

CONCLUSION.

Though the institution is predominantly a Dental college & Hospital, there is significant environmental research both by faculty and students. The environmental awareness initiatives taken by the management are substantial. The installation of sewage treatment Plant, to recycle & reuse domestic waste water is highly appreciated. Usage of Tree plantation through a gift on Birth Day celebration & Bar Coding for each tree in Botanical Garden practices are advised to make Campus more beautiful & Green. Besides, environmental awareness programmes initiated by the administration proves that the campus is going green. The Herbal garden maintained by the College is highly appreciable. Few recommendations are added for waste management and waste reduction using alternate eco-friendly and scientific techniques. This may lead to the prosperous future in context of Green Campus and thus aid in a sustainable environment and community development

Vermicomposting sites for solid waste treatment are to be implemented & should be expanded in capacity to take care of total solid waste generated in the Campus.

There is a vast scope to install a 200 Kw solar power plant for generation of Green energy as adequate roof top area is available in the campus. Optimizing use of renewable energy is the first step taken to reduce greenhouse emission contributing a lot in Green Development.

Temperature/Humidity Display at the helm of the main building is recommended & praiseworthy feature indicating a totally dedicated Team for taking greenhouse project on management priority. This should be installed.

Students have been assigned responsibility for keeping the campus clean & it was a pleasure to note that students are equally cautious & interested in a noble cause of waste management.

Solar Street Lights to be effectively installed to beautify the campus in the evening & all credit should go to staff & Management for this wonderful scheme.

Last but not the least, Green awareness in the campus is of very high order & Team work is really appreciated. Lot of work has been done with initiative & awareness to keep College Campus Clean & Green & adequate maintenance is provided to sustain the efforts already taken.

Good Luck.
