Water Conservation Policy

Introduction

Karmaveer Bhausaheb Hiray dental college and hospital is committed to implementing comprehensive water conservation strategies to ensure sustainable water usage and management within the campus. The policy outlines the measures for rainwater harvesting, borewell, open well recharge, construction of tanks and bunds, waste water recycling and maintenance of water bodies and distribution system in the campus.

Purpose:

Mahatma Gandhi Vidyamandir's Karmaveer Bhausaheb Hiray Dental College and Hospital recognizes the importance of water conservation in preserving natural resources and promoting environmental sustainability. This policy aims to establish guidelines and practices to minimize water consumption and water wastage within the college premises.

Objectives –

- 1) Promote sustainable water use practices within the campus.
- 2) Reduce dependency on external water sources.
- 3) Ensure efficient water distribution and maintenance of water infrastructure.
- 4) Enhance ground water recharge and storage capacity.

Responsibilities:

Administration: The administration shall oversee the implementation of water conservation measures and ensure compliance with the policy.

Faculty and Staff: All faculty and staff members are responsible for adhering to water-saving practices and promoting awareness among students.

Students: Students are expected to participate actively in water conservation efforts and report any water leaks or wastage promptly.

1) Water Management Practices:

Regular Maintenance: Conducted regular inspections of plumbing systems, fixtures, and irrigation systems to detect and repair leaks promptly.

Efficient Fixtures: Installed water-efficient fixtures throughout the college campus.

2) Rainwater Harvesting:

Rooftop harvesting – Installed rain water harvesting system on buildings to collect and direct rainwater into recharge pits.

Surface runoff- Constructed percolation tanks and bunds to capture surface runoff and promote ground water recharge.

3) Waste water Recycling:

- Institution has established Sewage Treatment Plant and Effluent treatment plant for waste water where waste water gets recycled and that treated water is used for watering plant, irrigation and cleaning.
- Treated water reuse reduces freshwater consumption.
- Ensure regular testing of treated water is done to meet safety standards for reuse.

4) Construction of Bunds –

- Constructed bunds to slow down water flow,
- prevent soil erosion and increase water percolation into the ground.
- **Maintenance of tanks and bund** -regularly inspect and repair tanks and bunds to prevent leaks and ensure their integrity.

5) Borewell and open well recharge –

- Established bore well and open well recharge to enhance ground water level.

6) Maintenance of water bodies –

- To preserve natural and artificial water bodies in the campus, maintenance of water bodies carried out regularly.
- Regularly cleaning natural and artificial water bodies to maintain water quality and storage capacity.
- Monitoring water quality to detect and address pollution or contamination issues promptly.

7) Water distribution system –

- Ensured efficient and equitable distribution of water across the campus.
- Upgrade old and inefficient pipes, valves and fixtures to reduce wastage.

- By integrating these components into a comprehensive policy, the campus can significantly reduce its water footprint, promote sustainable practices and ensure reliable water supply for the future.

8) Landscaping:

Organised tree plantation drive to enhance ground water level.
Utilization of native and drought-resistant plants for landscaping to minimize water usage for irrigation.

9) Green Audit and environmental audit –

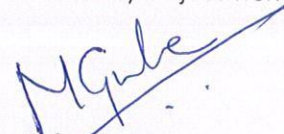

The institute has been conducted green audit and environmental audit to safe guard the environment, energy conservation, water conservation, use of renewable energy sources, etc. The institute has been taken maximum effort to maintain campus eco-friendly.

10) Awareness Campaigns:

Organized awareness campaigns to educate the college community about the importance of water conservation and simple practices to reduce water consumption.

Water Conservation Guidelines:

- **Turn off Taps:** Encouraged turning off taps tightly after use and report any dripping faucets or leaking pipes promptly.
- **Limit Water Use:** Promoted responsible water use by encouraging shorter showers, turning off taps while brushing teeth, and using water-efficient appliances
- **Reporting:** Water leaks, wastage, or inefficient water fixtures are promptly reported to the maintenance department and it is promptly repaired by maintenance department.
- **Monitoring and Evaluation:** Regularly monitor water consumption and evaluate the effectiveness of water conservation measures. Make necessary adjustments and improvements based on the findings.

CIRCULAR

This is to inform all UG and PG students, interns, teaching and non-teaching faculty and all administrative and support staff that the second version of our existing 'Code of Conduct' handbook is ready to be published online.

After taking into considerations and suggestions, many new points have been added including the 'Dress Code Policy' as suggested from the management too.

The printed version of "Code of Conduct Handbook v.2.0" will be available for reference in central library and the soft copy will be published on Institute's website.

All concerned are requested to read the document and implement the same.

Code of Conduct for Patients and Visitors

- Everyone will be treated with kindness, dignity, and respect.
- Offensive comments about race, religion, gender, sexual orientation, or personal traits are not acceptable, and neither is the refusal to see a clinician or associate based on these traits.
- All patients and visitors will use respectful, appropriate language and behaviour.
- Physical or verbal threats or assaults, suggestive or explicit words, phrases, gestures, or actions will not be tolerated.
- All patients and visitors will respect patient privacy and avoid disrupting other patients' care or experiences.
- All patients and visitors must obtain the consent of everyone involved for any photographing or video/audio recording within all hospitals and patient care locations.
- Possession of firearms or any weapon is not allowed.
- Throwing objects and/or destroying property is legally offensible.
- Yelling, using profanity, or other actions that disrupt the care and treatment of our patients is to be strictly avoided.
- Using or being under the influence of drugs or alcohol (with the exception of those patients requesting or undergoing treatment).
- If the guidelines are not followed, patients may be asked to leave and make other plans for their non-emergent immediate care, and for severe violations, future non-emergency care.
- In cases of non-compliance, patients will have an opportunity to explain their perspective, which will be considered prior to any decisions regarding future care at our hospital.
- Visitors may be asked to leave and could be restricted from future visitation.
- Every day, our providers, nurses, and associates are committed to providing the highest levels of care to our patients. Please show them the respect they deserve and that you expect as a patient or visitor.
